

## **Technical Sales Representative -- Oil & Gas**

### **Salary 115k +**

Location; First year at the corporate office in Toronto and then anticipated relocation to Houston, Texas.

A world leader in ground geophysical services

Our client, a leading global ground geophysical services group, is pleased to announce a number of openings to join its expanding team of professional geoscientists. With this organization you will be exposed to proven deep exploration technologies, including Earth Imaging systems, and Magneto telluric systems. Our client is also a leader in conducting conventional Ground Geophysical surveys using a variety of methods.

As an employee, you will be working in one of the company's three focus areas, specifically Oil & Gas. The other two areas are Mining, and Geothermal.

You will need three to five years of experience in a dynamic sales environment specializing in Oil & Gas Exploration. Experience with Geothermal Exploration would be an asset. You will initially be based in Toronto for one year with anticipated relocation to Houston after this period. The successful individual will lead the company's sales and marketing efforts in the Oil & Gas area, and report directly to the Head of Sales and Marketing for the Company

Our Client is an equal-opportunity employer with a focus on maximizing employee growth and development throughout their work. Successful candidates will possess strong communication skills, requisite sales or technical skills, and a keen desire to excel and ensure customer satisfaction—an important element of our client success. Educational credentials are flexible, although candidates with advanced degrees, particularly, in geophysics, or geology are preferred.

Interested candidates are requested to send a cover letter stating their interest, along with a resume to [alacaille@proactionhr.com](mailto:alacaille@proactionhr.com)
